

MECHTech.

SIMULATIONS

Here you can download the Case file and Complete Workbench files for the YouTube video "[Comparison of Water and Castor Oil Bottle Emptying | Transient Multiphase CFD Simulation | VOF-Ansys](#)". You can make the necessary modifications (Boundary Conditions, transient time settings, Fluid Properties like viscosity, density, surface tension etc.,) and analyze them for your academic or learning purposes. For further assistance, please feel free to contact us at +91 9488469801 or support@mechtechsolutions.com

Case File

I hope you have given a good review to my Google profile. If not, please do so; it will be really helpful to me. (<https://g.page/r/CdbyGHRh7cdGEBM/review>) Have a happy learning.

Thank you so much for your support!
